

Montreal Brewing Co. is the first carbon neutral brewery in Quebec and Canada. The result of a successful technological integration.

OCO Technologies was mandated by [Montreal Brewing Co.](#) to implement the **GO-TECH^{MD}** solution with structured approach to apply the best practices of "Low Carbon Manufacturing" allowing companies to position themselves as leaders in their industry. To reduce its greenhouse gas emissions, a company must consider several options including the intensification of its processes and the integration of high-performance technologies.

Montreal Brewing Co. is one of the most important microbrewery in the Greater Montreal area offering basic and specialty beers, besides having 3 resto-bar. Through continuous performance improvement and innovation, the company knew how to stand out by becoming the first carbon neutral brewery in Quebec and in Canada, in conformity with the international standard ISO 14064.
